

Prefixx Vinyl & Vegan Leather Warranty

5 years

Uses: Indoor, excludes Gyms

Care Instructions

Normal Cleaning

Remove dirt and smudges with Textile House 4 in 1 Leather & Vinyl Cleaner or mild soap and water solution and clean with a soft cloth or towel. It is recommended to rinse cleaned area with fresh water then dry with a soft lint-free cloth or towel.

For more difficult stains, continue to the special cleaning instructions below. Do not use abrasive powder, steel wool, or industrial strength or solvent cleaners.

Special Cleaning

Levante Vegan Leather can be cleaned and disinfected with a 10% diluted household bleach (sodium hypochlorite) solution (1:9 bleach to water ratio). Following cleaning and disinfection with bleach, rinse cleaned area with fresh water then dry with a clean lint-free cloth. It is only recommended to use this very occasionally as using bleach often can reduce the life expectancy of the vinyl significantly.

Caution Undiluted bleach, isopropyl alcohol or lacquer can dull or damage the product. If in doubt about a detergent or cleaner, test a patch in an inconspicuous place before applying in a larger place.

Warranty Terms & Conditions

This Warranty does not cover issues arising from: (a) staining or degradation resulting from interaction with other components of an upholstered product; (b) damage caused by post sale application of coatings, conditioners or other surface treatments; (c) improper installation or structural failure of the upholstered product; (d) damage caused by accidents, misuse, abuse or vandalism; (e) deterioration caused by exposure to harsh or abnormal conditions; or (f) deterioration due to exposure to cleaners or methods of cleaning which do not comply with Textile House standard care and cleaning instructions. This warranty is valid from the date product is manufactured and is not transferable.

Prefixx Coated Vinyl Cleaning Instructions

Disinfection

PreFixx® protected upholstery can be disinfected with a variety of hospital grade disinfectants with little to no discolouring or damage to the finish. Disinfection does not replace the need for regular care and maintenance.

Special Cleaning Problems

Although performance fabrics treated with PreFixx protective finish are resistant to most common stains, the dyes and pigments in some staining agents have the ability to create a permanent stain if not treated properly. To clean difficult stains from upholstery treated with PreFixx protective finish, locate the staining agent in the lists below and follow the corresponding recommended cleaning method. For best results, treat all stains immediately.

Cleaning Tip:

To determine the method and type of cleaners, the source of the stain should be identified.

Staining Agents: Baby oil, ketchup, chocolate, motor oil, olive oil, grape juice, urine, blood, hair oil tonic, tea, coffee and betadine. Use method 1.

Staining Agents: Eye shadow, crayon, grease, tobacco tar or nicotine, yellow mustard and lipstick. Use method 1. If stains persist, use method 2.

Staining Agents: Permanent felt tip marker, ballpoint pen and spray paint. Use method 2. The recommended cleaners used in Cleaning Methods 1 and 2 are progressively more aggressive. Often, it is better to begin with the least aggressive cleaner and move to the next strongest only if the stain remains. NEVER EXCEED a staining agent's recommended cleaner or cleaning method, however.

Method 1: Use an all-purpose cleaner with a soft cloth or damp sponge. Rinse area with fresh water then dry with a clean, lint free cloth.

Method 2: Use a solvent-type cleaner*, such as rubbing alcohol (isopropyl alcohol). Rinse cleaned area with fresh water then dry with a clean, lint-free cloth. If the stain persists after six rubs, the stain has set and probably cannot be removed. Rinse cleaned area with fresh water, then dry with a clean, lint-free cloth.

*Caution: Follow all product use instructions. Use in well ventilated area; some solvents are highly flammable. Exercise proper care in cleaning and notify personnel in area of danger. Use caution in cleaning around buttons, stitching and wooden or decorative trim, since these solvents could damage such areas..
